

**Application/Design**

The United Enertech *Power / Balance System™* was developed to provide an easier means of balancing the HVAC system of individual rooms or zone temperature control. The system is composed of a damper, actuator, RJ-11 plenum rated, or Standard Non-Rated cable, female receptacle and a hand-held battery pack to adjust for designed air flow in the room or zone.

**Remote Controller Features**

**Battery Pack**

- Bi-directional Rocker Switch
- (2) 9-volt Batteries (included)
- 7ft. Pre-wired RJ-11 cable (standard) - custom lengths available
- For use with Models i-3, i-4, i-5, i-6, & Hi-i-3

Due to continuing research, United Enertech reserves the right to change specifications without notice.
